

Journey

A one-stop program to manage yours and your clients corporate environmental responsibilities.

TES has recognised the complexity of climate change response issues for our clients and developed a one-stop program to cater for those needs.

The TES Journey Program is a fully integrated suite of services to address not only your climate change regulatory requirements, but more importantly, the positive opportunities for increased shareholder value and acknowledged environmental leadership.

The TES Journey Program delivers and guarantees long term energy savings which enhance your competitive advantage and your employee's satisfaction with your responsible corporate culture.

TES Journey Program can manage a diversity of energy and water solutions, integrating advancing technologies such as Trigenation, Cogeneration and Renewable Energy across your multiple facility portfolios.

The TES Journey Program can provide the necessary expert resources across a diverse range of services to guide your progress along the path of climate change solutions, saving you the need to deploy a team internally, source new personnel, or contract with a raft of organisations to meet the range of your greenhouse gas obligations over the long term.

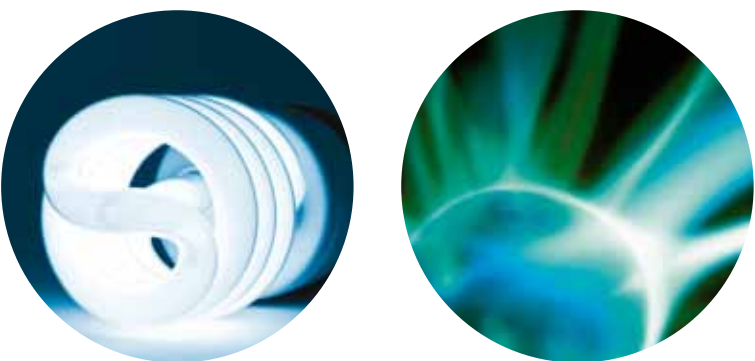

The TES Journey Program gives you the opportunity to position your organisation as a provider of climate change solutions to your clients as well.

The Journey Program can be used under licence from TES to provide a comprehensive range of services to your own clientele. The Journey progress towards carbon footprint reduction by your company or your clients will be fully documented by TES, and certified where appropriate to ensure confirmation of results to stakeholders and shareholders alike.

Carbon Offset

The TES Journey Program also provides a carbon offset service so your organisation can move towards carbon neutrality, by authorising the planting of trees through the accredited organisation as part of its mix of greenhouse action plans.

When you join the TESJourney Program, your initial commitment towards sustainability is recognised by TES arranging for the planting 10 trees for each new membership (once your your carbon offset plan is registered).

Communicating the Green Agenda Internally and Externally

Once your Organisation becomes a TESJourney Partner you will receive a Journey Pack which includes material to promote the TESJourney Program internally, recognising the cultural change philosophy of sustainability needs to be adopted across the organisation.

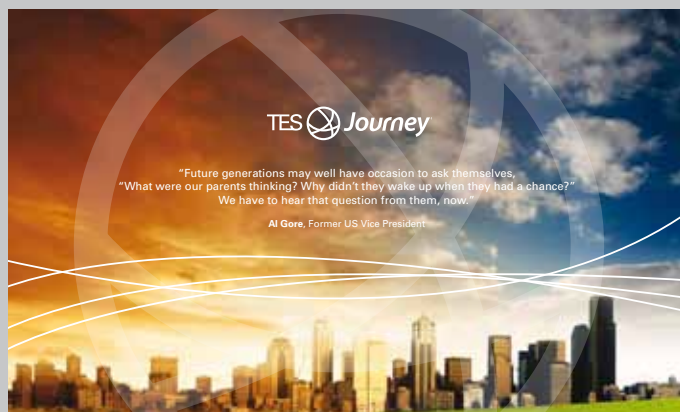

Members of the TES Journey Program may also use the Journey Partner Logo in their internal and external communications to promote public awareness for their commitment to addressing climate change issues.

By publicly utilising the Partner logo you clearly demonstrate your active participation in the Journey Program and your stakeholders can be assured that your environmental governance responsibilities are being professionally and appropriately managed.

Promotion

The TESJourney Program provides a promotional Journey Pack for you to demonstrate your green credentials.

The Pack includes a Promotional Poster, Partner Logo and Guidelines, Access to promotional TShirts & caps available for purchase to promote the program internally, and much more.

Example Logo Usage

Total Energy Solutions
